From the list at the end of the document.

[MINUTES]

As decided in the meeting, the next steps for the BI WG and its POC are:

The next BI WG will take place during the XBRL Days in Milan, on the 5th February.

We will share about the Proof of Concept: considered data and equivalent BIRD Variables. Face-to-face work will be more efficient than a phone call.

As a reminder, the POC idea is summarized in

<http://www.xbrleurope.org/wp-content/uploads/2019/11/XEU-BIWG-POCPERIMETER-v00.pdf>

It aims to show how XBRL can be used for granulated and consolidated data, with more business meaning for concepts and better approaches for high volumes of data.

To go further on concrete actions on the POC, active participation of software vendors is needed.

As already discussed, the XBRL Europe Board is willing to reward active contributions by communication on results and presentations.

Software vendors are invited to develop their your views on

- The POC perimeter
- The use of XBRL technology/tools for granular data big data volumes
- The use of XBRL technology and existing dictionary like BIRD to give full and unique business meaning to concepts

The aim is that participants prepare more actively the topic, use the material and links on www.xbrl-europe.org/biwig to review FINREP, Anacredit, SHS, BIRD contents and initiate concrete works.

NEXT MEETING: 5th FEBRUARY 2020 – XBRL DAY see www.xbrl.eu/biwig for details
