

ESEF USE CASES

29th April 2021

Between ESEF and analysis – why the investor perspective should always be considered. Tagging and anchoring examples.

Mr. Till Schneider

ABZ Reporting GmbH

Member of xBRL Germany

e-reporting with XBRL – We are a specialized company

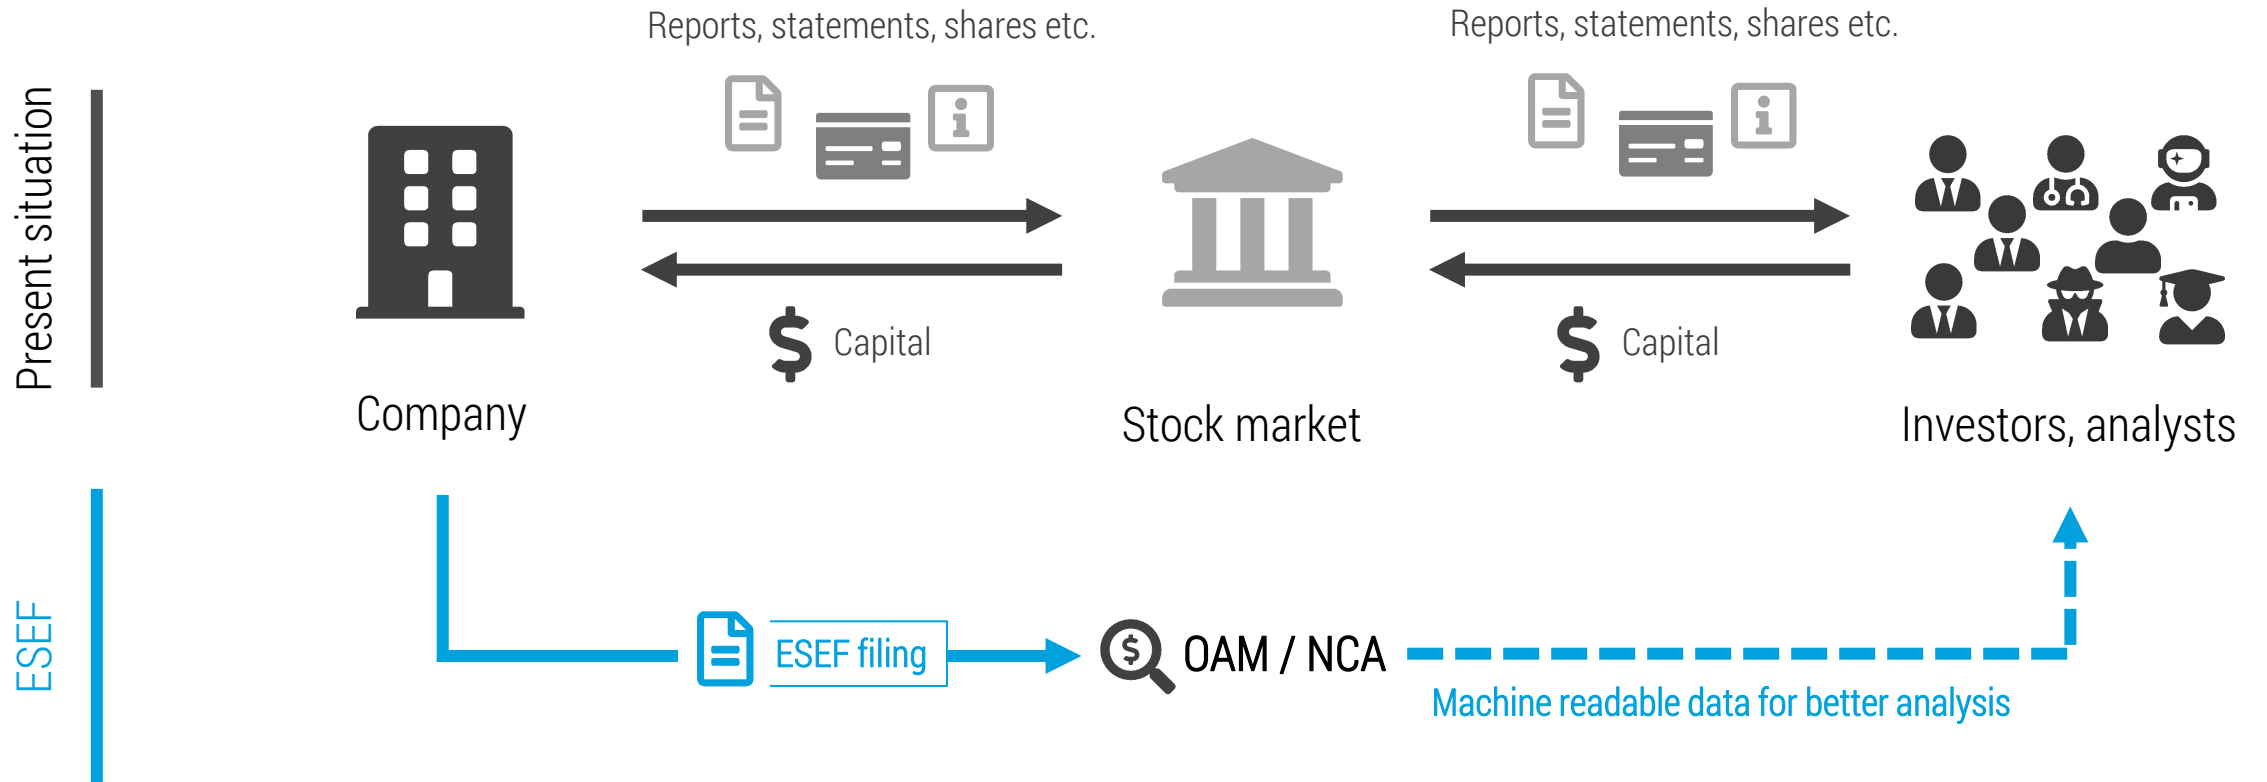

ABZ Reporting GmbH, headquartered in Darmstadt, Germany, is a leading software vendor specialized in the standard eXtensible Business Reporting Language (XBRL). Offering XBRL solutions since 2005, ABZ is also a member of national and international XBRL committees, which are involved in all key projects for the introduction of XBRL on the German market.

XBRL application examples in Germany

- » Publication of trade statements at Bundesanzeiger
- » Tax declaration/ E-Bilanz (German tax authorities)
- » European bank/insurance supervisory reporting (EBA/EIOPA)
- » Digitaler Finanzbericht (DiFiN) (credit rating of German banks)
- » ESMA — European Single Electronic Format (ESEF)

What's ESEF about?

And analysis comes always with ratios and key figures based on the provided data, doesn't it?

In case of ESEF the machine readable data is based on the tagging and anchoring

But how to ensure a proper tagging and anchoring?

(use cases are shown in reportfactory tagging tool software)
