

**28th XBRL EUROPE
DIGITAL WEEK**

22-24 June 2021

XBRL CSV and Granular Data, the WG initiative (Anacredit example)

- Vincent LE MOAL-JOUBEL
- Banque de France
- XBRL Europe

Anacredit : Context

- *Analytical credit datasets : ECB project, launched in 2011*
 - *Detailed information on individual bank loans in the euro area that exceed 25 000€, reported monthly to quarterly*
 - *High volume of data*
 - *First filings in 2018*
 - *First attempt to create a XBRL POC in XBRL Europe in early stages but:*
 - *No available DPM tools, POC taxonomy with tuples*
 - *Less experience on large volumes, no xBRL-CSV project*
-

Anacredit : Counterparty example

- *Counterparty reference data definition*

Template 1	Data set	Description	Data attribute	Level of Granularit	Frequency	Data set updates	
						New Record	Changes
Template 1	01. Counterparty reference data	<p>The counterparty data describes the characteristics of the counterparty, which rarely change over time.</p> <p>The counterparties to be registered are all those linked to instruments or providing protection to secure such instruments. Specifically, the counterparties to be registered are: (a) creditors; (b) debtors; (c) protection providers; (d) originator; (e) servicers; (f) immediate parent undertaking and (g) ultimate parent undertaking. A single entity may be the counterparty in several instruments or take different roles as a counterparty for the same instrument. However, each counterparty should only be registered once.</p>	Reporting agent identifier	Counterparty	Update	Monthly	Monthly
			Counterparty identifier				
			Legal Entity Identifier (LEI)				
			National identifier				
			Head office undertaking identifier				
			Immediate parent undertaking identifier				
			Ultimate parent undertaking identifier				
			Name				
			Address: street				
			Address: city/town/village				
			Address: county/administrative division				
			Address: postal code				
			Address: country				
			Legal form				
			Institutional sector				
			Economic activity				
			Status of legal proceedings				
			Date of initiation of legal proceedings				
			Enterprise size				
			Date of enterprise size				
			Number of employees				
			Balance sheet total				
			Annual turnover				
			Accounting standard				
Template 1	02. Instrument data	The instrument data describes the features of the instrument, which rarely change with time.	Reporting agent identifier	Instrument	Update	Monthly	Monthly
			Observed agent identifier				
			Contract identifier				
			Instrument identifier

Anacredit DPM

- What XBRL brings:
 - Standardization of data :
 - The data, defined with dimensions, is easily generated/consumed with XBRL tools, already installed in most NCAs and banking filers, thanks to EBA CRR XBRL reporting
 - Extensibility :
 - Each country can add specific fields. These custom fields can be removed before being sent to ECB. Done with SII reporting with conversion formula to filter ECB data
 - Reuse of other reporting concepts, in our case EBA concepts, permitting cross-reporting comparison
 - Presentation :
 - XBRL add the possibility to define how to display data
 - Multiple languages can coexist (like in SRB taxonomy)
 - Validation
 - Controls can be natively implemented
 - Validations depend on precision declared on data
-

Anacredit DPM

- What xBRL-CSV brings :
 - Lighter filings

xBRL-CSV

Anacredit version DPM

- What xBRL-CSV brings :
 - Easily readable and editable
 - Metadata is mutualized and written in small json files
 - Data is written in csv files
 - CSV files are editable without XBRL knowledge
 - Table data in separate csv files
 - Easier to access specific data

Remise Anacredit XBRL

- Conclusion
 - We are not working on changing actual Anacredit reporting
 - It gives us a good basis to prepare for integrated reporting
 - Experiments on real data with sufficient volume
 - Real validation challenges
-

Next steps

- Modelize more Anacredit tables with DPM methodology
 - Analyzing existing Anacredit controls and implementing compatible ones, inter and intra tables
 - Add multi-language labels
 - Use real anonymized data if possible
-
