

## European Single Access Point (ESAP) (1/2)

*As an investor, where do I find information today?*

- **No centralised search system** on all public information on entities or financial products
- **Digital use and re-use of information hampered** by inadequate formats, language barriers, restrictive terms of use, inability to bulk download, paid access, questionable quality, integrity and credibility of data.

## European Single Access Point (ESAP) (2/2)

- ESMA mandated to **establish ESAP by 2024** (phased-in approach completed by 2026)
- The ESAP will provide:
  - **Access to financial and sustainability related information at EU level** from one single access point, to everyone, and for free, to information collected mainly at national level.
  - All information will be **available in a data-extractable format, enabling comparability**, and under open terms of use.
