

# Bank & Insurance Working Group

*Co-Chair Vincent Le Moal Joubel, Thomas VERDIN*

## **Agenda**

- News
- CRD6 CRR3 with new COREP V4 templates in the EU
- Pilar 3 Data Hub, with direct xBRL-CSV filing to EBA
- Releases implementation updates : EBA
- xBRL-CSV
  - DORA
  - Json meta data files
  - XBRL INTERNATIONAL
- Insurance templates
- Frankfurt Conference
- AOB

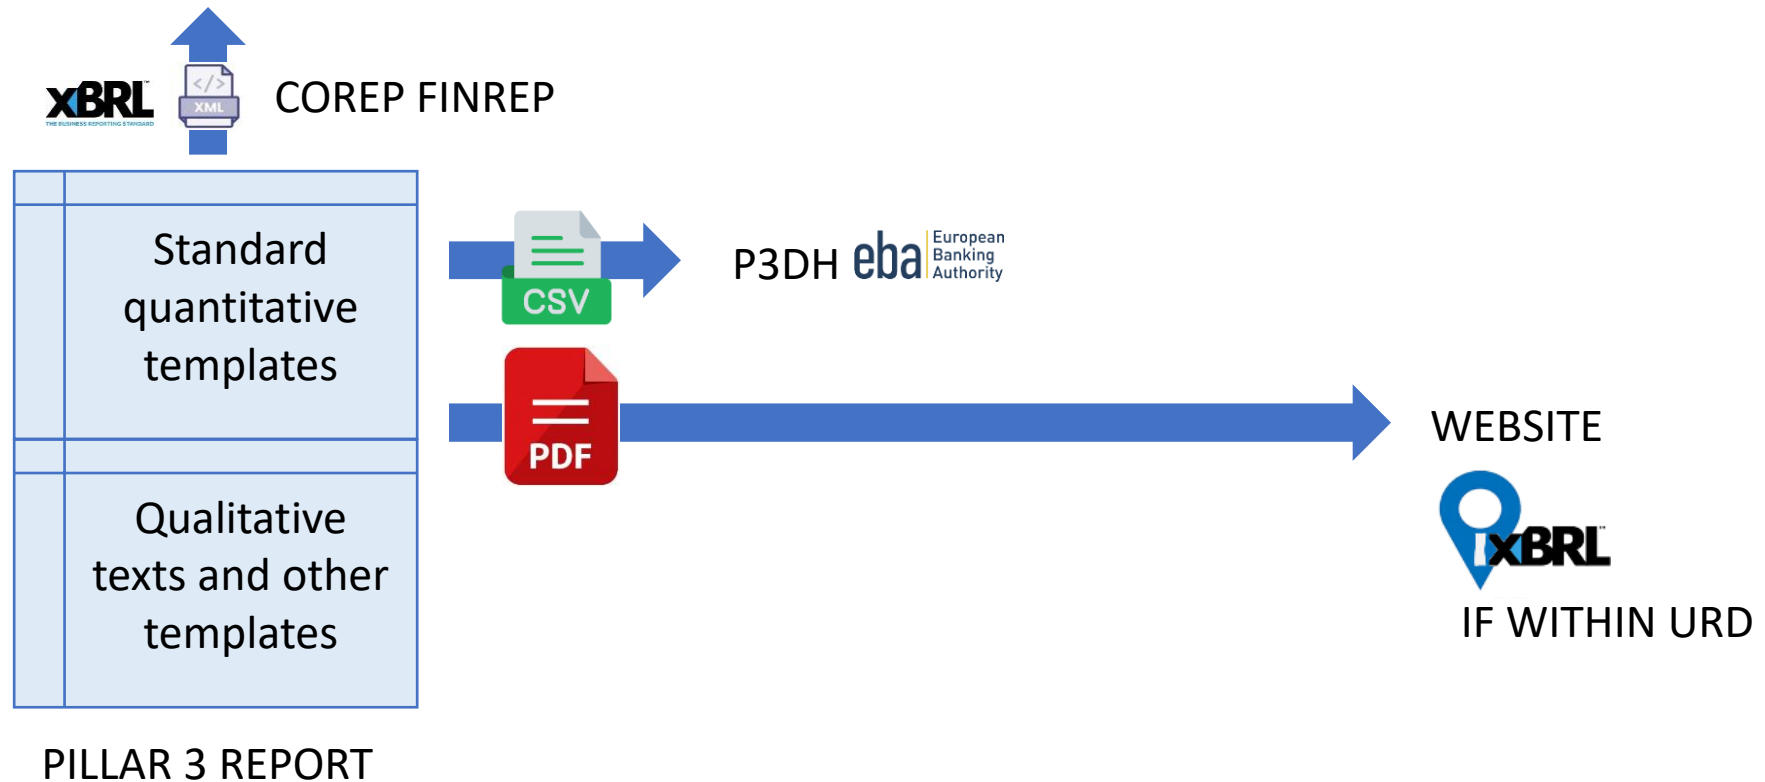

# COREP V4

**EBA reporting framework 4.0 is expected to apply from 03/2025.**

It includes the following new and amended reporting requirements:

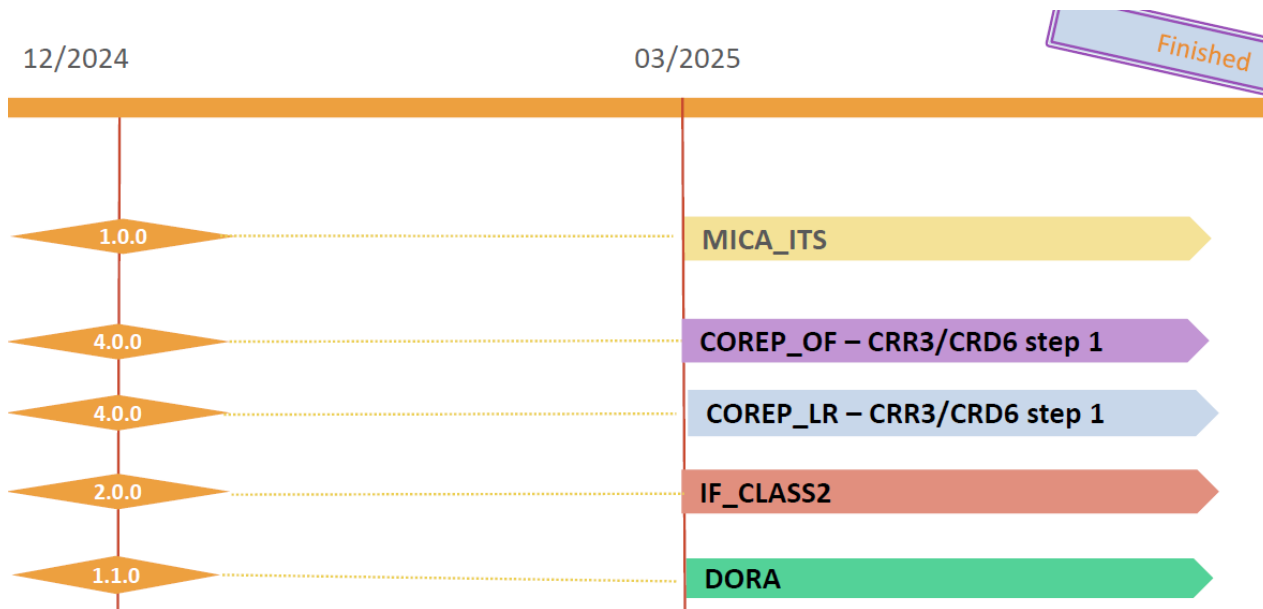

AREA OF REPORTING	NATURE OF CHANGE	EXPECTED FIRST REFERENCE DATE
CRR3/CRD6 changes (step 1)	Amendments to the ITS on Supervisory Reporting linked to changes and new requirements in relation to CRR3/CRD6 in step 1 (necessary changes to implement and monitor Basel III requirements in the EU)	03/2025
Investment firms reporting	Minor changes to COREP templates reported by class 2 investment firms due to CRR3/CRD6	03/2025
MiCAR reporting ITS	New ITS introducing reporting requirements for issuers of asset-referenced tokens (ARTs) and of e-money tokens (EMTs) denominated in a non-EU currency under Regulation (EU) 2023/1114 on Markets in Crypto-assets (MiCAR). The ITS also provide templates and related instructions that crypto-asset service providers (CASPs) must provide to issuers of ARTs and of EMTs denominated in a non-EU currency.	03/2025
DORA ITS	New DORA ITS (amendments to the DPM and taxonomy published in 3.5 to align with the ITS changes taking place during the EC adoption process).	03/2025
Supervisory Benchmarking	No changes will be implemented in the technical package for SBP IMV module for exercise 2025. SBM validation portfolios will be reported in exercise 2025 through template C 120.02 with reference date June 2025 (and not Feb 2025, reference date specified in the draft ITS), as in previous exercise.	no changes

# Pillar 3 Data Hub

# Releases implementation updates : EBA

## Reporting framework 4.0

- The last errata version (errata 5) published on 20/03/2025
- Taxonomy (architecture 2.0) produced and published, and only for those modules in scope ITS (COREP\_OF, COREP\_LR, IF\_CLASS2, DORA, MICA\_ITS)
- Both DPM 1.0 (without validation rules) and DPM 2.0 (with validation rules) published
- Validation rules in language DPM-XL (new grammar)

## Reporting framework 4.0 : Errata 5

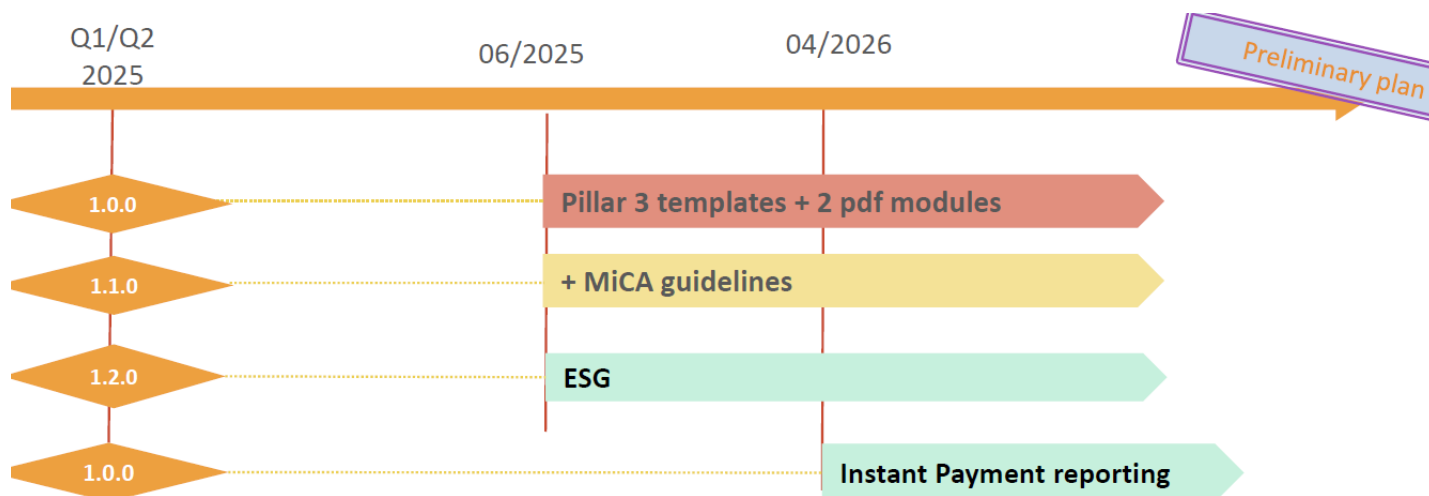

- ❑ It was discovered recently that default member is being used in 4 subcategories (qEC3, qEC2, qAE1, qAE0) as one of the allowed values on the key dimensions for some tables in COREP\_OF modules, this bad practice will make conversion from xBRL-XML to xBRL-CSV impossible, this release is to replace the default members qx0 with a new member qx01 in these 4 subcategories.
- ❑ On Taxonomy:
  - Amend 8 files in domains qae and qec folders to add new member qx01 and amend the subcategories
  - Deactivate the impacted validation rules and also several rules that missed to be deactivated on 11/03/2025
- ❑ On DPM2:
  - Apply the queries in file DPM2\_replace\_Default\_Members\_4\_0.txt to add the new member to replace the default members in 4 subcategories
  - Apply the queries in file deactivate\_vrs\_20250220.txt to deactivate the rules.
- ❑ On DPM1:
  - Apply queries in file DPM1\_replace\_Default\_Members\_4\_0.txt to add the new member to replace the default members in 4 hierarchies
- ❑ On validation rule excel files:
  - deactivate rules with deactivation date 20/03/2025
- ❑ On glossary excel file:
  - add new member qx01 in two categories qEC and qAE, and replace qx0 with qx01 in four subCategories.

## Reporting framework 4.0 : Modelling issues detected

- ❑ Same modelling on table C\_10.00 column 0090 and column 0100
  - Q&A ticket 2025\_7321 (column 0100 should not be reported)
  
- ❑ Same modelling on table C\_10.00 row 0010 and row 0030
  - r0030 not needed to be reported
  
- ❑ C\_07.00 (r0210, c0010-0040) should not be greyed out.
  - Q&A ticket 2025\_7348 (the amounts relating to the risk weight of 70% applicable to exposures secured by commercial immovable property (Article 126(2) CRR) should be reported in the row 0280 of C 07.00 'other risk weight')
  
- ❑ C\_25.01.b same modelling for row 0010 and 0020: no Q&A ticket

# Releases implementation updates : EBA

## Reporting framework 4.1

**Final publication: End May 2025**

**Publication materials:**

- DPM 2.0
- DPM 1.0 (migrated back from DPM 2.0) without validation rules
- Taxonomy generated on DPM 2.0, according to Taxonomy architecture 2.0

## Reporting framework 4.1

### ❑ Pillar 3

- 8 Modules: CODIS, FINDIS, ESGDIS, GSIIDIS, IRRBBDIS, MRELTACDIS, P3DH, REMDIS
- Reporting format: xBRL-CSV
- All validation rules deactivated (they will not be generated in the taxonomy)
- 2 pdf modules: P3\_REM\_DIS\_DOCS and P3\_NONREM\_DIS\_DOCS
- Reporting frequency: quarterly, semi-annual or annual (depending on the templates)
- Data nature: consolidated or individual
- Data collected directly from institutions

### ❑ MICA

- Two modules : MICA: ITS+guidelines and MICA\_OF: Q\_09.01,Q\_09.02(for the entities having own funds in scope)
- Frequency: quarterly
- Remittance date for first reference date: 01/09/2025
- Reporting format: xBRL-CSV
- Data nature: individual
- Reporting subject: LEI-TokenID.IND

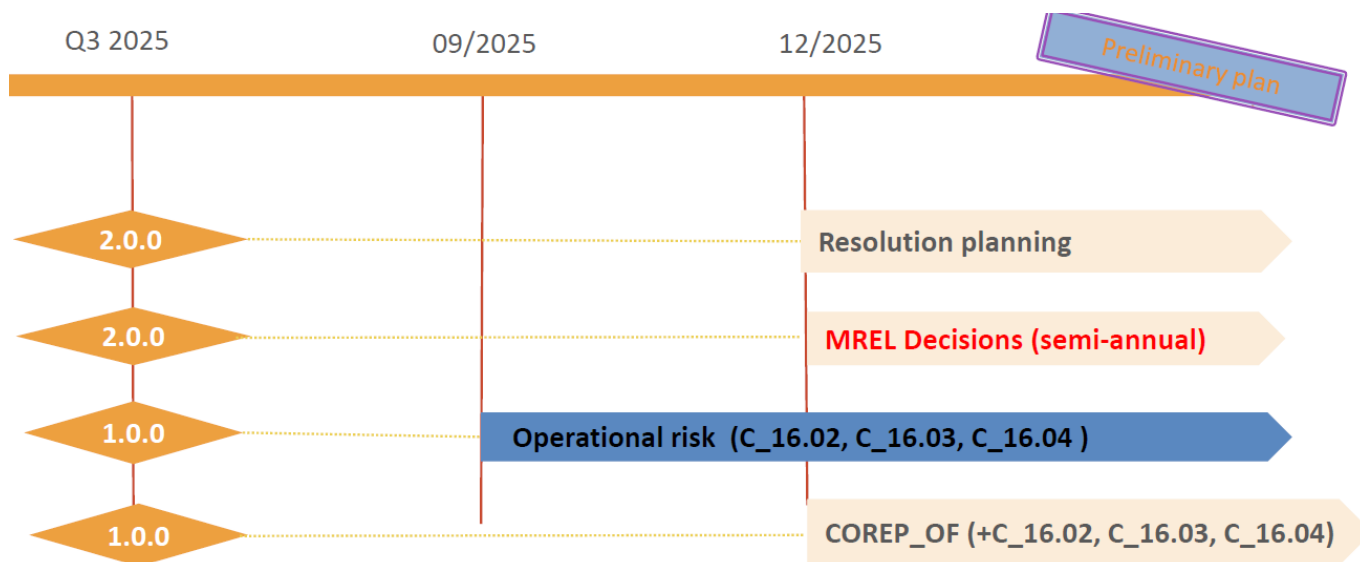

### ❑ Instant Payment Reporting

- First remittance date 04/2026 (Collect 4 reports for reference date 12/2022, 12/2023,12/2024, 12/2025)
- For remittance date 04/2027:collect report for reference date 12/2026...
- Annual report
- Reporting format:xBRL-CSV
- Reporting population: CreditInstitutions,Payment Institutions,Electronic money institutions...

# Releases implementation updates : EBA

## Reporting framework 4.2

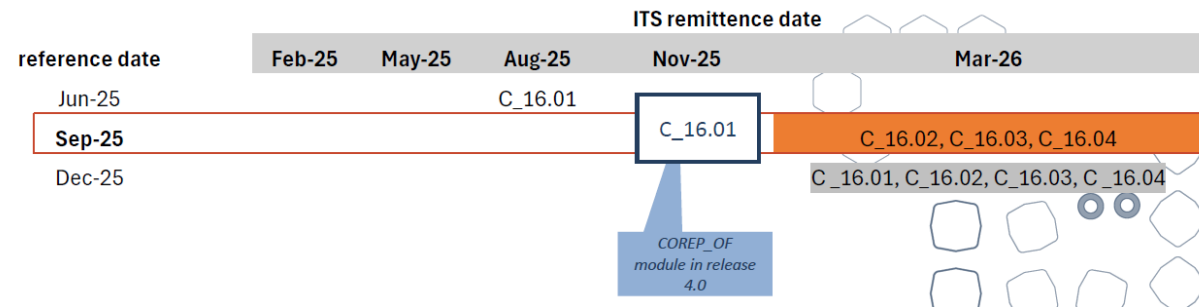

- ❑ Publication materials:
  - DPM 2.0
  - Taxonomy generated on DPM 2.0, according to Taxonomy architecture 2.0

## Reporting framework 4.0 : Operation risk module and COREP\_OF module

- ❑ **New module Op\_Risk with 3 new templates C\_16.02, C\_16.03 and C\_16.04 only for reference date 09/2025, with a latter remittance date in 03/2026**
- ❑ COREP\_OF will be updated also in release 4.2 with first reference date 12/2025 to:
  - Include 3 operation risk templates C\_16.02, C\_16.03, C\_16.04
  - Amend detected modelling errors
  - Amend validation rules
  - Separate module COREP\_OF for templates with calendar end year and for templates with financial end year
  - Remittance date: 03/2026

postponement of the remittance date for the first reference date Sep 2025

## Reporting framework 4.0 : Resolution

- ❑ To harmonize reports between SRB and EBA
- ❑ To use the same module between SRB and EBA, SRB does not need to touch taxonomy on EBA
- ❑ To use table constraints specifications to define the constraints on the datapoint and between the keys and foreign keys.

→ EBA had discussion with SRB on the JSON meta data definition and on the csv reporting format.

- It is decided that at current stage, EBA will continue to use “one fact per row” csv data structure, but leave the door to discuss further options in the future especially for the open row table

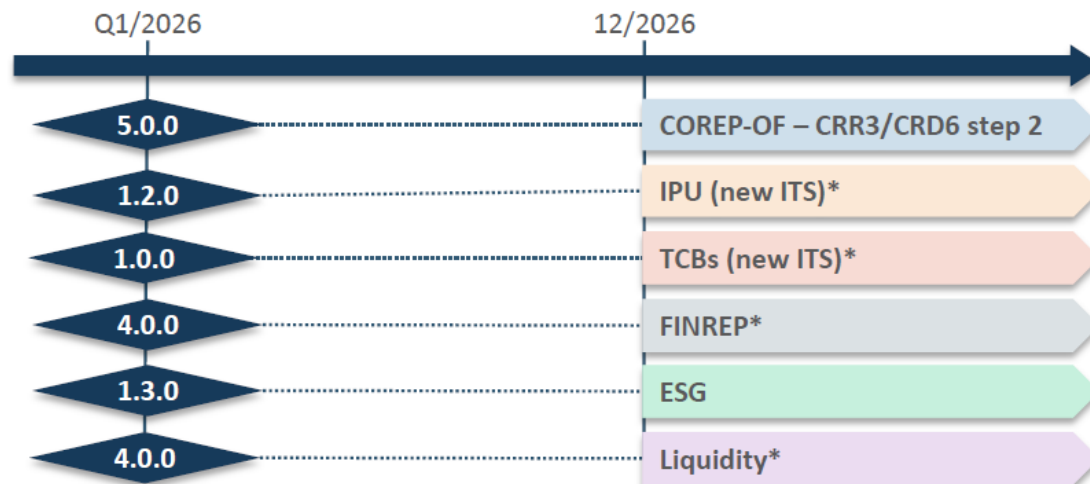

## Reporting framework 4.0 : Finalise data quality project

- ❑ **Finalize data quality project**, all the glossary revised, new glossary replace old glossary.
  - All the modules should be modelled with the whole revised new glossary, including those not in ITS
  - All the latest module versions with revised new glossary should be applied from 12/2025 if it is not applied before.
  - In case it is not possible to remodel all the modules, republish module produced in 3.2 to support xBRL-CSV format :
    - Change filing indicator parameters using function instead Xpath
    - Change or deactivate few validation rules using XPath

# Releases implementation updates : EBA

## Reporting framework 4.3

### New reporting standards and amendments to existing reporting standards

Tentative

### Considerations

- Part of this release may be reviewed/postponed in light of the simplification mandate

### COREP – Step 2.1

- Operational losses
- IP Losses
- Exposures to shadow

banking

- Transitional arrangements

### ESG

ESG module based on Pillar 3 ITS plus prudential “COREP style” information.

# xBRL-CSV : DORA

## ☐ ROI SUBMISSIONS

- Reference date : 31/03/2025
- Format xBRL-CSV => « PLAIN CSV » (EBA)
- Reporting framework CRR 4.0 errata 5

# xBRL-CSV : DORA

# xBRL-CSV : JSON meta data files

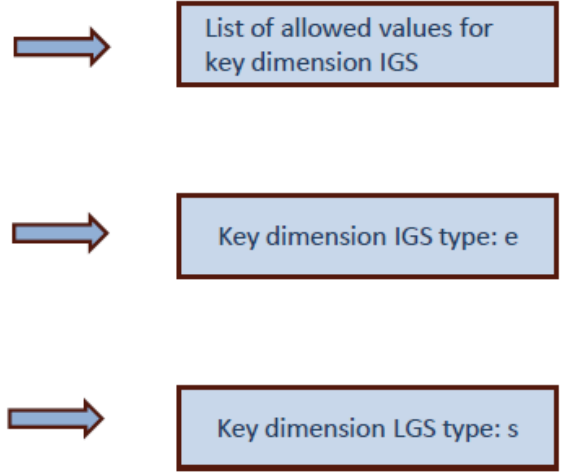

- ❑ JSON meta files have been generated and published for all historical modules in the taxonomy.
- ❑ JSON files include information on :
  - Converting xBRL-XML to xBRL-CSV
  - Basic validation of xBRL-CSV file (EBA specific in property eba:documentation)
  - Integration of xBRL-CSV reporting files into database (EBA specific in property eba:documentation)
- ❑ Later this year, EBA can use table constraints specification to define metadata in JSON files to support basic validation.

# {table}.json file : additional properties on objects

- Besides defining the list datapoints used and key dimensions used in the table.
- It also defines for each datapoint, its data type, its allowed values;
- And for each key dimension, its data type and its allowed values;
- And the keyVariableID, FactVariableID, RowID/ColumnID/SheetID, propertyID, ItemID etc. to help to integrate the data.

# xBRL-CSV : XBRL INTERNATIONAL

## OIM-Formula

Status: Candidate recommendation

[OIM-compatible Formula 1.0](#)

XBRL International needs involvement from Software providers to support this specification by implementing it. For now, at least 1 software company is working on implementing the specifications.

# xBRL-CSV : XBRL INTERNATIONAL

## **xBRL-CSV Table Constraints**

Status: Public Working Draft

[xBRL-CSV Table Constraints 1.0](#)

xBRL-CSV allows very efficient representation of tabular XBRL data

Already used in Dora ROI reporting.

Should be used for IReF reporting

A second Public Working Draft will be published in the following days

# xBRL-CSV : XBRL INTERNATIONAL

## Digital Signatures

Status: Candidate Recommendation

[Digital Signatures in XBRL 1.0 \(D6\)](#)

Develop consistent approaches for applying existing signature technologies to XBRL reports

A second Candidate Recommendation has been approved, conformance suite available.

# xBRL-CSV : XBRL INTERNATIONAL

## OIM Taxonomy Initiative

Status: Early stage

[OIM Taxonomy Model Implementation Plan 1.0](#)

XBRL International is now actively working on the next phase of the OIM modernisation programme: OIM Taxonomies

Goal is to separate XBRL Taxonomies from XML syntax, as for XBRL reports

Stronger remit for modernisation than OIM Report initiative

3 day face-to-face meeting planned for this later this month

# INSURANCE

## Taxonomy roadmap – NACE 2.1

### Option 1 :

- Do not publish a new taxonomy and report the NACE 2.0 until 2027

### Option 2 :

- Publish a new taxonomy in 2025, introducing a new column for 2.1 codes for all the reporting frameworks as they are all impacted by the new 2.1 classification (integrated release of SII, IORPs, PEPP PR, FICOD would be published for Q42025/annual 2025 reference dates), while retaining the current NACE 2.0 as mandatory when available.

- EIOPA published [Q&A 2931](#) clarifying the reporting for Q1-Q2-Q3 2025 reporting reference periods
- A decision whether EIOPA to publish a hotfix of all the frameworks valid from Q4/Annual 2025 reflecting on the NACE changes needs to be taken, considering as a major issue the comparability of the data to be reported.

# INSURANCE

## Taxonomy roadmap – future plans

### ☐ Solvency II framework

- ITS amendment on reporting and disclosure (ongoing work in ENW3)
  - ✓ Reflecting the Level 1 and Level 2 changes under the Solvency II review (applicable from January 2027)
  - ✓ Including new information e.g. on NatCat data, on pension data already available in the ECB add-on E.02.16
  - ✓ Reducing reporting burden (reduce reporting frequency, increase proportionality by thresholds, delete certain tables/templates/information and simplify templates) (application date to be confirmed)

## Open question: taxonomy start date of ITS amendment

- According to the outcome of a public consultation from June 2024 “**the first submission with new taxonomy should remain for Q4/Annual reporting reference periods** of due to its practical advantages and long-established practice. Any consideration of a transition to a January 1 implementation date, even on an exceptional basis, must thoroughly address the identified technical and operational challenges to adequately manage stakeholder concerns.”
- The ITS amendment based on the SII Review will be applicable from January 2027**
- Therefore, the new Solvency II taxonomy release (2.10.0) should be applicable also from Q1 2027**
- ECB add-ons’ application date would be from Q4 2027**
- EIOPA and ECB are analysing solutions and will consult NCAs and the industry.

## **Taxonomy roadmap – future plans**

### **☐ Insurance Recovery and Resolution Directive (IRRD)**

- EIOPA is planning to use an XBRL taxonomy also for the IRRD reporting framework
- An IRRD Project Group (PG) was set up for the reporting requirements under EIOPA's Risk and Financial Stability Committee (RFSC) and work has already started on drafting the templates.
- Applicable from January 2027, with first reporting reference period of Annual/2027 to be reported in 2028
