

ESEF in the UK, Controls and Reportl

SPEAKER

Jon Rowden, Friend Studio

ESEF in the UK

- Pressing ahead, climbing the maturity curve
- Regulatory emphasis on the quality of filings
- Controls a focal point: Provision 29

Controls

2024 Corporate Governance Code

Director declarations for 2026

ESEF-specific controls

What is Reportl?

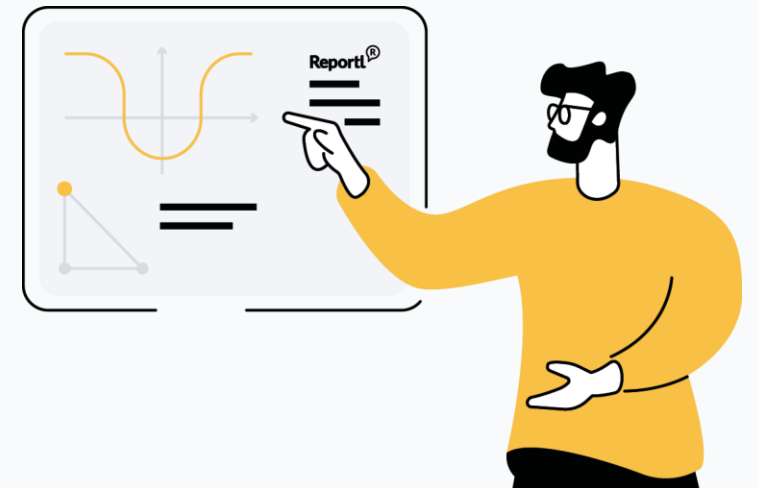

Reportl is a purpose-built reporting Content Management System

Developed by specialist reporting agency Friend Studio.

How does Reportl work?

Reportl enables one source of content to be published instantly across all required formats (online, iXBRL, PDF, print).

Why move to digital design software?

Reportl's analytics show that 90% of users select the digital-first tagged report format over PDF.

What are the benefits of using Reportl?

Reportl aims to bring reporting into the digital age with minimal disruption to current workflows.

How does Reportl help digitisation?

Companies and their designers can deliver fully designed, engaging online reports, PDF, legal filings, and print reports all from one source of content.

How does Reportl help compliance?

Full digital reporting is mandatory.

Print software wasn't built for this purpose, as a result, regulators have suggested companies move to 'native' XHTML reporting.

Questions and thank you
