

XBRL Europe membership

XBRL Europe brings together European jurisdictions, institutions, companies, and experts who are committed to improving digital business reporting across Europe. Established in 2008, it fosters collaboration, promotes the use of XBRL standards, and maintains close relationships with European authorities to ensure alignment with evolving reporting requirements. Through its working groups, annual conferences, and specialized webinars, XBRL Europe provides a vibrant platform for members to exchange knowledge, influence regulatory developments, and build partnerships across industries.

Membership benefits

All XBRL Europe members gain access to a wide network of peers, participation in working groups, and opportunities to shape the future of digital reporting in Europe. Membership provides both visibility and influence:

- Networking & Collaboration – Join specialized working groups on supervisory reporting, business registers, securities, sustainability, and digital reporting.
- Grant access to XBRL International membership and associated benefits such as participation to XBRL international working groups
- Representation & Governance – Eligible members may participate in governance elections, influencing XBRL Europe’s direction.
- Events & Exposure – Members enjoy access to XBRL Europe Week, webinars, and dedicated partner sessions.

- Visibility & Promotion – Depending on membership level, members benefit from website promotion, branded materials, and event sponsorship discounts.

Premium and Silver Membership

Premium membership is designed for organizations that seek maximum visibility, engagement, and strategic influence. Premium members enjoy enhanced brand presence at events and on the XBRL Europe website, participate in exclusive discussions with the Board, and may host or co-host XBRL Europe events.

Silver membership provides valuable participation rights, access to working groups, and standard visibility on the website and at events, ideal for organizations seeking steady engagement within the XBRL community.
